

# Allen and Overy Perth Office Fit-out

Level 12 Exchange Tower, 2 The Esplanade

Allen and Overy, a leading internationally law-firm, were the first firm to reach Australia and now run operations out of Perth and Sydney.

In a move to consolidate their Perth operations on to one floor, OPRA Project completed a stunning high-end fit-out on Level 12 Exchange Tower, offering a much more dynamic and flexible workspace, accommodating for more staff and reflecting their local operations as well as the Allen and Overy brand as an international powerhouse.

The joinery component was a significant package of works and required diligent coordination by the team to ensure the design intent was maintained and the exceptional degree of quality was met.

With multiple local, interstate and international stakeholders, including the IT division managing the relocation of the server, a high degree of attention to communication was required.
