

## ECU Bloomberg Social Media and Trading Rooms

Joondalup Campus

### Project Summary

In order to create a 'real-life' environment for their Commerce students, ECU sought to upgrade their Bloomberg Media and Trading rooms with a complex integration of latest AV technology. Auto tracking cameras, individual work stations, large screens for clear projection and the ability for communications from remote locations were installed.

Working with Laurence Lim from Taylor Robinson OPRA Projects were set an ambitious programme to deliver the refurbished lab space in a compressed time-frame in order for the space to be ready for the university for 2017.

Quality trade selection with the capability of delivering on a compressed programme was required, while also offering a solutions base response to long lead-time items and in sourcing alternative materials.

Building performance was also improved by the installation of lighting controls and mechanical BMS control system.

### Project Details

### Features

#### Client

Edith Cowan University

#### Value

\$704K inc GST

#### Duration

8 weeks

#### Size

275m<sup>2</sup>

#### Architect

ZMHA

#### Consultant

Wood and Grieve

#### Contract

Fixed Lump Sum

Sensitive university environment

High stakeholder involvement

Compressed programme

High AV component
